

Well and Pump Services

WELL AND PUMP SERVICES

WELCOME TO MAHER SERVICES

Maher Services is a third-generation drilling, well and pump service company. Our goals are to provide clean water supplies and improve water quality for municipal, industrial, agricultural and recreational markets throughout New England.

We offer a wide variety of drilling and maintenance services, from well exploration to production well development along with a full line of pump and well services.

We are continuously developing innovative solutions that will improve water quality and well efficiency such as in-situ well maintenance with our Pantonite iron and manganese removal process.

At Maher Services we work closely with our customers to identify problems and provide cost-effective, timely solutions.

WELL SERVICES

Well Rehabilitation

Mechanical Methods

- Surging
- Brushing
- Jetting
- Sonar Jet
- Air Purging

Chemical Methods

- Acid Treatment
various industry standard chemicals
- Pantonite
An NSF approved blend of Acids designed to remove Iron and Manganese bio-fouling. Pantonite can be used as a maintenance process by treating the well without removing the pump
